

Assignment (13): Steel Construction

The following drawing indicates roughly plan view for a multi-purpose hall consists of a group of spaces that differentiate in functions, areas and heights. The designer intends to use Steel structural systems. You are required to:

1. Choose the suitable structural systems for these spaces.
2. Design the main elements of these systems. You should determine the parameters of all elements.
3. Draw to scale 1:50 a detailed plan, looking-up plan view and cross section.
